

Celero Cloud GmbH headquartered in Ettlingen is a European-wide provider and developer of mobile applications for internal and external services.

To support our team, we are looking for a:

## **Developer / Junior Developer (f/m)**

In your new job you are part of our agile software development team and involved in projects right from the beginning. You are supporting the programming and implementation of innovative field service applications that meet the highest standards of performance and reliability. You work with the latest technologies and can bring in your own ideas.

### **About the role**

- Development and optimisation of software solutions using Java and modern frameworks such as Spring and Hibernate
- Continuous optimisation of existing software applications with a focus on scalability and performance, as well as adding new features
- Programming of interfaces for e.g. RESTful API's and EDI
- Planning and conducting tests

### **About you**

- Completed training as IT specialist or a just completed degree in computer science
- Good knowledge of software development, especially with JAVA would be an advantage but is not obligatory
- Handling of SQL, in the ORACLE or Postgres environment
- Fluent German and English spoken and written

To apply for this opportunity, please send your full application to: [i-apply@celerocloud.com](mailto:i-apply@celerocloud.com).
